HOWELL MODERN METAL DINING CHAIRS

Model A590 Blactone chair
Model A990 Bronztone frame
Box seat, curved back.

Model A595 Blactone chair
Model A995 Bronztone frame
curved panel back, box seat.

Model A581 Blactone arm chair
Model A981 Bronztone frame
Companion to No. 571.

Model A571 Blactone chair
Model A971 Bronztone frame
Model A171 Chromsteel frame
curved back, brass grill.

Model A36 Blactone chair
Model A936 Bronztone frame
Model A136 Chromsteel frame
Box seat, brass plated wire back, 1⅛" disc plastic feet.

Model A543 Blactone chair
Model A943 Bronztone chair
Box Seat, curved back with wire grill decoration, adjustable feet

Model A551 Blactone chair
Model A951 Bronztone frame
Large curved back, box seat, brass leg ferrules.

Model A67 Chromsteel chair
Finest chrome plating, wrap around frame below seat.

Model A40 Blactone chair
Model A940 Bronztone chair
Lightweight chair, curved back, padded seat, brass ferrules.

Genuine brass ferrules
No-Sag springs built into frame
Black fibre board cushion protector
Foam rubber or helical spring inside cushion construction
It's Done with Mirrors . . .
To show you the many Howell quality features.

Fine Features

OF HOWELL MODERN METAL FURNITURE

- **MODERN UPHOLSTERED CHAIRS, SECTIONALS** Built-in comfort and long-lasting qualities are carefully designed into Howell Upholstered Furniture. Optional offering of foam rubber or helical spring cushions in seat and / or back enhance saleability. Beneath the seat cushions is a smooth surface vulcanized fibre board affixed onto the No-Sag springs which are built into the tubular frame. The tubular frame is welded and screwed securely to provide a sturdy base for comfort.

- **BRONZTONE LEG FINISH** is an electro-plated surface of bronze color onto the tubular steel of dining chair legs. A clear plastic coating is applied for long-wearing protection. It is highly resistant to tarnish and discoloration and harmonizes with wood finishes.

- **BLACTONE LEG FINISH** is produced by an exclusive patented process of phosphorizing of a jet black color into tubular steel. Each part is sheathed in a baked-on plastic coating.

- **CHROMSTEEL LEG FINISH** is three process plating of nickel, copper and chromium onto tubular steel to produce a lustrous, mirror-smooth, highly polished finish that retains its bright appearance indefinitely.

- **ADJUSTABLE SWIVEL FOOT** is used on dining table, occasional tables, and most dining chairs. It is self-leveling to uneven floors. A brass and white plastic foot of this type is easy-gliding, providing a mobile furniture unit.

- **TABLE EDGES** are available in two styles — plastic self-edge $1\frac{5}{8}$" or $2\frac{1}{4}$" wide, matching table top, and the stainless steel metal edge $1\frac{1}{8}$" wide.

- **PLASTIC TABLE TOPS** are finest quality laminated plastic on lumber core plywood base. This plastic surface is highly resistant to alcohol, fruit acids, grease, fats, scuffing, denting, cracking, and is not affected by heat to 275° F. It cleans easily with a damp cloth.

- **COLOR SWATCHES** of plastic tops and upholstery covers give you a wide choice to "personalize" your furniture. For plastic table top several woodgrains and patterns are available. The dining chair upholsteries are available in several patterns and colors of vinyl plastic that are washable and long wearing. For upholstered furniture, popular upholsteries such as U. S. Naugahyde, DuPont Fabrilite, Nylo-Saran, Zeta (Scotchgard protected) woven fabric, offer a choice of over 35 colors. Swatch cards can be obtained for final selection from your dealer or the Howell Co., St. Charles, Illinois.
